

Wire Guard T5

Wire Guard T5 is designed with rugged wire mesh to address the problem of vandalism and breakage and thus ensuring general illumination for everyone's safety and convenience.

Key Features

- Based on linear wire guard batten, offering high performance T5 fluorescent lamp operating at High Frequency.
- Epoxy powder coated and oven baked. Not pre-coated. Gives high reflectance and durable finishing with no sharp edges to rust.
- Locking rotary type lampholders – premium quality & safety for life.
- Multiple cable entry option for direct wiring to ceiling and suitable for conduit mounting.
- Grommet cable entry to protect cable.
- High wiring standard with all internal wires retained (wires do not hang down during installation and colour coded).

Wire mesh hangs down, facilitates easy maintenance.

Additional Features

T5 features, *Noiseless Operation, Reduction in Power Consumption and Flicker-Free Illumination.*

Wire guard is jig formed and powder coated white.

Tough and robust batten due to heavy gauge welded construction and die formed.

Unique "ridge stand off" design achieves F mark compliance without unsightly rear stand-offs.

Ordering Guide

SINGLE		MODEL NO
2ft	1x14w	GWG 114
3ft	1x21w	GWG 121
4ft	1x28w	GWG 128
5ft	1x35w	GWG 135
TWIN		MODEL NO
2ft	2x14w	GWG 214
3ft	2x21w	GWG 221
4ft	2x28w	GWG 228
5ft	2x35w	GWG 235
