

INCLINATION

Architectural Semi-Recessed Luminaires

Supreme Visual Comfort and Excellent Aesthetics

INCLINATION features the diverse ability to bring general ambience to the surrounding, enhance vertical illuminance, soften the dark cave effect and yet, delivers task specific direct lighting – in one package.

INCLINATION exemplifies visual comfort and unimposing aesthetics – benefits derived from the symphony of:-

- Symmetrical back reflectors
- Inclined diffusing panels below ceiling level
- Central panel with direct or refractive optics
- 16mm T5 lamps and
- Low decibel high frequency electronic control gear

Key Features

- Inclined diffusing panels with 35mm drop below the ceiling for uniformly diffused emission and gentle illumination of ceiling.
- Combination of diffusing optics of general illumination and VDU compliant glare control optics.
- One piece hinged optical control unit for easy installation and maintenance.

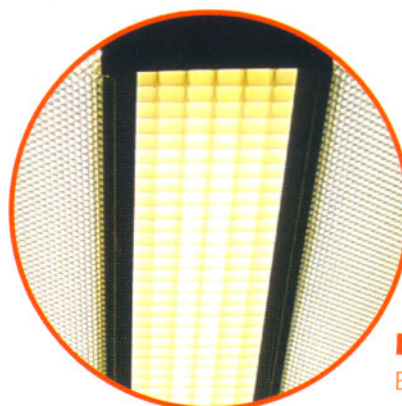

Options for Central Optics

- High reflectivity louvers, $65\% < 1000\text{cd/m}^2$
- Refractive optics with opal + perforated inlay
- Precision molded EggCrate louvre for direct lighting
- Perforated Vanes for direct lighting

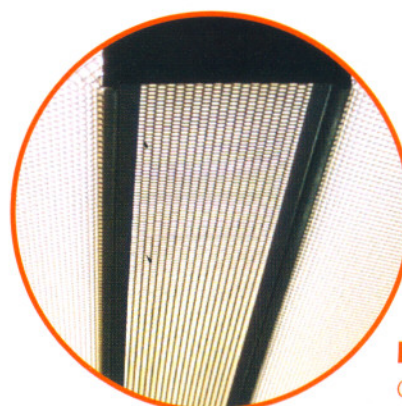

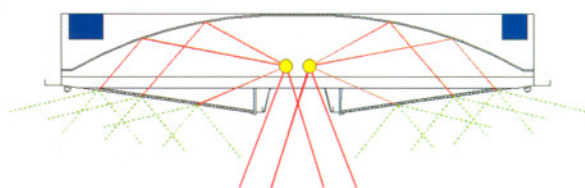

Lamp Type	Rating
T5 HE High Efficiency	14 W / 28 W
T5 HO High Efficiency	24 W / 54 W

Ceiling landscape is enhanced by the luminous diffusing panels, which is positioned slightly below the ceiling.
