

## ULI - FLIGHT T-5 Suspended - Architectural Luminaire

ULI-Flight is a range of linear lighting system that utilises the T5 technology in an aesthetically sculptured pendant luminaire. It's minimalist proportions and classical lines add unobtrusive presence to any interior environment.

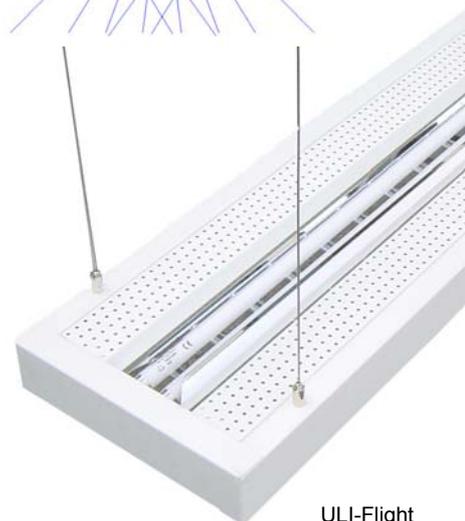

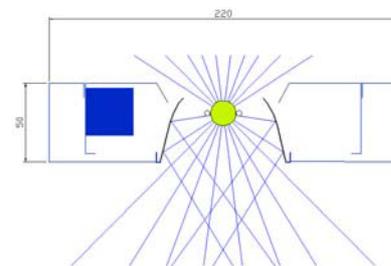

*ULI-Flight is ideal in providing a diffused and virtually glare-free illumination that is so important in any task-intensive workplace.*

### Key-Features

- Supreme lighting engineering & economical operations with high frequency ECG.
- Hinged and detachable gear tray for easy access to control gear.
- Wire Grip and suspension wire – optional accessories.
- Quick release wire grip system for easy adjustment of suspension height.
- Light distribution – approximately 60:40 down light / up light.
- Lower optics gives controlled brightness and low glare from precision engineered T5 louvres.
- Upper optics gives soft ambience and addresses the LG3 addendum requirement.
- Advance optical systems leverage T5 high-output parabolic louvres in satin matt or highly specular anodised aluminium.
- Tool-free installation of louver with spring catches holding louvres in place.
- Ease of installation and maintenance ideal of design-build projects, corporate buildings, offices, work space, reception areas and libraries

*Enhanced visual comfort is the hallmark of this direct/indirect luminaire. Lower optics is provided by newly designed and precisely engineered parabolic lamellae resulting in efficient lamp shielding and high efficiency. Soft ambience from the upper optics provides glare-free ceiling illumination.*
