

Uni Curve

Miniaturised Surface Mounted Compact Fluorescent Fittings

This range of miniaturised surface mounted compact fluorescent luminaires has an attractive micro perforation centrepiece plus a unique slimline housing profile of only 55mm in height. It's wide angle light distribution is especially suitable for general illumination in corridors & aisle way. Used individually, the luminaire shows it's distinctive characteristics. It can easily be matched to any interior deco.

Key-Features

- Sleek & Flat surface mounted light modules.
- Space saving & non-obtrusive dimensions.
- Blends harmoniously with office environment on account of it's simplicity.
- Single continuous curved reflector as theme for Optical Control Unit.
- Highly luminous 36W compact fluorescent lamp or T5 lamp.
- Perforated reflector enabling soothing rays of illuminations.
- Refreshing lighting effects from perforated centrepiece reflector.
- Overall aesthetic appearance of Uni-Curve reflectors.

Materials / Finish

- Heavy gauge welded steel construction for housing. Die formed – makes fitting tough and robust.
- Centre reflector – aluminium micro perforations with round holes.
- Epoxy power coated & oven baked, not precoated – durable gives high efficiency and no sharp edges to rust.
