

Asymmetrical Fittings

For directional illumination, U-LI Goodlite's range of asymmetrical light fittings provides an effective wall wash effect with exceptional lamp shielding. Harnessing the power of single or twin lamps, these fittings utilise a precision formed reflector optic that delivers high levels of vertical illumination and washes walls with shadow free light from the ceiling to the floor. Highly appropriate in retail areas requiring excellent illumination of shelves and wall displays to maximise sales and achieving optimum point-of-sales success.
